SUMMARY

Full stack developer with 3+ years of experience in Laravel, PHP, and Vue.js. Built high-traffic web applications serving 70,000+ users with strong security, clean code, and fast performance. Comfortable owning features end to end — from architecture planning to production deployment — and partnering with teams to ship on time.

TECHNICAL SKILLS

Backend: PHP, Laravel, RESTful APIs, PHPUnit

Frontend: HTML5, CSS3, JavaScript, Vue.js, Tailwind CSS, Bootstrap 5

Database: MySQL, Database Design, Nova Laravel, Query Optimization

Tools & DevOps: Git, GitHub, GitLab, AWS, Pantheon, WordPress

Additional: API Integration, Version Control, Remote Collaboration, Agile Methodologies

WORK EXPERIENCE

Full Stack Developer, Hybrid

ScarMatrix, Onsite | Nov 2025 – Present

- Lead end-to-end delivery across multiple startup products, from architecture planning to production rollout
- Oversee and contribute to core development across Laravel, Vue, and Filament-based platforms
- Manage Shopify and WordPress implementations for e-commerce and content-driven business needs
- Coordinate priorities across projects, ensure delivery quality, and guide technical direction as a senior engineering owner

Full Stack Developer, Remote

Bizionic Technologies, India | Feb 2025 – Nov 2025

- Developed and maintained Laravel applications with Vue.js frontend for multiple international clients
- Built and optimized RESTful APIs, reducing average response time by 30%
- Implemented automated testing with PHPUnit across high-priority workflows
- Managed AWS deployments and Git workflows across distributed teams

Tech Stack: Laravel, Vue.js, PHP, MySQL, Nova, Filament, RESTful APIs, AWS, Git

Key Projects:

- Bizionic Technologies Website (bizionictech.com): Full-stack development with Vue frontend and Laravel backend
- ZA Case Management Website (zacasemgt.com): Laravel-based case management platform for personal injury services, built with Filament admin panel and jQuery AJAX

Software Engineer (Full Stack Developer, Onsite)

Cloud-1, Onsite | March 2023 – Feb 2025

- Architected custom CRM for Punjab Employees Social Security Institution (PESSI), serving 7+ million people — improved accident and hospital data management across departments
- Delivered event management website for Salesforce Dubai Dreamin' conference, handling 1,000+ registrations with mobile-responsive QR scanner functionality
- Built Cloud-1 corporate website with custom Filament admin panel, reducing content update time by 60%
- Developed features for Engineering for Change (E4C), a global platform serving 70,000+ engineers worldwide, using WordPress, PHP, and Tailwind CSS

Backend Development Intern

MTech Solutions | Dec 2022 – Feb 2023

- Optimized Laravel backend systems, improving API response times by 25%
- Implemented API request auditing, monitoring systems, and database query optimizations

PROFESSIONAL PROJECTS

Punjab Employees Social Security Institution (PESSI) — pessi.punjab.gov.pk

Tech Stack: Laravel, PHP, MySQL, Vue.js, RESTful APIs

Custom government CRM with role-based access control, accident and hospital data management, and comprehensive testing coverage for the Government of Pakistan.

Engineering for Change (E4C) — engineeringforchange.org

Tech Stack: WordPress, PHP, Tailwind CSS, JavaScript, Git, Pantheon

Enhanced user management system serving 70,000+ engineers worldwide. Implemented user profile system and content management features.

Dubai Dreamin' — Salesforce Official Event — dubaidreamin.com

Tech Stack: Laravel, Vue.js, PHP, MySQL, RESTful APIs

Event website and mobile-responsive QR scanner app for Salesforce's official Dubai event, handling 1,000+ registrations.

ZA Case Management — zacasemgt.com

Tech Stack: Laravel, Vue.js, PHP, MySQL, Filament, RESTful APIs

Laravel-based case management platform for personal injury services with Filament admin panel and jQuery AJAX for seamless user interactions.

Bizionic Technologies Website — bizionictech.com

Tech Stack: Vue.js, Laravel, PHP, MySQL, Nova, AWS

Full-stack corporate website with secure API endpoints, custom admin panel, and role-based access control.

Cloud-1 Corporate Website — cloud-1.co

Tech Stack: Laravel, Vue.js, PHP, MySQL, RESTful APIs

Dynamic company website with Filament admin panel for multi-department content management.

EDUCATION

Bachelor of Computer Science

Virtual University of Pakistan | Oct 2023 – Ongoing
