## SUMMARY

Full stack developer with 2+ years of experience in Laravel, PHP, and Vue. Built high-traffic web apps serving 70,000+ users with strong security, clean code, and fast performance. Comfortable owning features end to end—from planning to deployment—and partnering with teams to ship on time.

---

## TECHNICAL SKILLS

- **Backend:** PHP, Laravel, RESTful APIs, PHPUnit
  - **Frontend:** HTML5, CSS3, JavaScript, Vue.js, Tailwind CSS, Bootstrap 5
  - **Database:** MySQL, Database Design, Nova Laravel
  - **Tools & DevOps:** Git, GitHub, GitLab, AWS, Pantheon
  - **Additional:** API Integration, Version Control, Remote Collaboration, Agile Methodologies
- 

## WORK EXPERIENCE

### Remote Full Stack Developer , Bizionic Technologies India Feb 2025 - Present

- As a **contract full stack developer** I develop and maintain Laravel applications with Vue.js frontend, focusing on API development and integration
- Create and optimize RESTful APIs for client applications using Laravel best practices
- Implement automated testing using **PHPUnit**.
- Manage AWS deployments and Git version control workflows
- Optimize database queries and implement caching strategies for improved performance

### Software Engineer (Full Stack Dev) , Cloud-1 March 2023 - Feb 2025

- As a Full-Stack Dev, worked as core dev in creation of a **custom CRM** website for the **Punjab Employees Social Security Institution (PESSI)** backed by **Government of Pakistan**. Worked on streamlining accident and hospital data management, resulting in a improvement in reporting accuracy and data management.
- Successfully delivered an event website for **Salesforce's Official Dubai Event**, enhancing user engagement and reducing load times. Build a web-end mobile responsive scanner app for the event.
- Architected and implemented a dynamic **Cloud-1 website** with a custom backend **admin panel**, resulting in an increase in content update efficiency and enabling real-time data management across multiple departments.
- Developed and enhanced features for **Engineering for Change (E4C)**, a global platform backed by **IEEE** and **ASME** serving **70,000+** engineers worldwide. Implemented user profile system and content management features using **WordPress, PHP, JavaScript, and Tailwind CSS**.
- Delivered user management functionalities and platform optimizations using **Git** and **Pantheon** workflows, including automated deletion processes and role-based access control, reducing administrative overhead.

### Backend Intern , MTech Solutions Dec 2022 - Feb 2023

- Optimized Laravel backend systems, improving API response times by 25%
- Implemented API request auditing and monitoring systems
- Conducted database optimization and query performance improvements
- Assisted in implementing automated testing procedures

---

## PROFESSIONAL PROJECTS

### Punjab Employees Social Security Institution (PESSI)

URL: <https://pessi.punjab.gov.pk/>

A custom CRM for the Government of Pakistan

- Developed custom CRM with comprehensive testing coverage
- Implemented accident and hospital data management for PESSI.

### Engineering for Change (E4C)

URL: <https://www.engineeringforchange.org/>

Technologies: WordPress, PHP, Tailwind CSS, JavaScript, Git, Pantheon

- Enhanced user management system serving 70,000+ engineers worldwide.
- Implemented user profile system and content management features.

### Dubai Dreamin (Event Management)

URL: <https://cloud-1.co/>

Technologies: Laravel, Vue.js, PHP, MySQL, RESTful APIs

- Developed custom CRM and implemented accident and hospital data management for PESSI.
- Optimized database queries and implemented caching

### Bizionic Technologies

URL: <https://www.bizionictech.com/>

Tech Stack: Vue, Laravel, Php, SQL, RestApi, Nova, AWS

- Implemented secure API endpoints and database optimization.
- Developed custom admin panel with role-based access control & features for the client side website

### Cloud-1.co (Salesforce Solutions Provider)

URL: <https://cloud-1.co/>

Tech Stack: Laravel, Vue.js, PHP, MySQL, RESTful APIs

- Implemented secure API endpoints and database optimization.
- Developed custom admin panel with role-based access control & features for the client side website

### InstaHirin

URL: <https://www.instahirin.com/>

Tech Stack: Laravel, Vue.js, JS, PHP, MySQL, Nova, RESTful APIs

- Dynamic company site with Nova as admin panel

---

## EDUCATION

**Bachelor of Computer Science**

Virtual University of Pakistan

**Aug 2022 - Ongoing**
